Dramatic changes have marked the European landscape in recent years: international conflicts, geopolitical shifts, the grim reality of war. Domestically, established political orders are being challenged by new parties while social fragmentation is on the rise. As Europeans seek their place in an increasingly volatile world, evangelical theologians come together to reflect on a Christian understanding of the nation, the political sphere, and the Church's place within it. Join us as leading international scholars explore both the practical and the theoretical questions involved in being faithful in times of turmoil.
