Session 05.01-05.03 - Summary

Lab title: Faith in the Public Square
Facilitator: Julia Doxat-Purser, Tatiana Kopaleishvili, Bethany Serengheu

1. What we learned

When we put our values first and apply them to our issues, understand why polarization happens and how we can lead people through change avoiding divides, learn how to identify polarities and have a depolarizing conversation, then we can begin to see a more Christ like way to deal with the challenges we face in society and the world.

2. Our proposed response

Face issues from a values-based analysis. Learn to lead through change avoiding polarization. Learn to identify polarities and have a depolarizing conversation.

3. Three concrete commitments

1. Put values first when dealing with these challenges
2. Highlight good practices
3. Look for resources that align with values versus polarized viewpoints
4. Train ourselves to be depolarizing people
