Session 06.01-06.03 - Summary

Lab title: Leadership
Facilitator: Connie Main Duarte

1. The challenge we addressed

Our Lab was designed around three areas where leadership is more complex and perhaps less spoken about. Women in Leadership, leadership transitions and intercultural leadership.

2. What we learned

Each of the three areas is important in our society and each happens on a day-to-day basis. Learning to not only deal with them but to anticipate them is key to making sure each area is worked through well and leadership in all areas is successful.

3. Our proposed response

We cannot ignore any of these areas of leadership, rather, we must face them, work through them carefully, include all voices and collaborate together to see that there is biblical leadership in place in all areas of the Christian life.
